

POLICY

ENVIRONMENT & OCCUPATIONAL HEALTH AND SAFETY

Our Environmental & Occupational Health and Safety (E & OHS) policy is derived from our corporate principles and applies to all business divisions.

AWARENESS

We demand and promote awareness of operational environmental protection as well as physical and mental health and safety among all our employees.

LEGAL BINDING

We are committed to complying with all environmental and OHS-related legal regulations and other requirements and engage to exceed them in a positive sense.

BUSINESS

We carefully manage raw materials, energy sources, water and waste and strive to continuously improve our energy, environmental and OHS performance. So, we not only contribute to protecting the environment and employees, but also reduce avoidable costs.

Our employees are our capital. Therefore, preventive occupational health and safety is very important to us. Healthy and satisfied employees provide services that are essential to achieving our economic goals.

DEVELOPMENT AND TECHNOLOGY

We support the conscientious use of natural resources by using modern technology. Development is our strength! The economical and selected use of resources begins with the planning and design of our products, continues in production through the selection of manufacturing processes and does not end with the finished product, because we advise our customers not only on how to use them, but also how to dispose them.

COMMUNICATION

We strengthen environmental protection and OHS through informative communication. This is how environmental and OHS awareness arises in active dialogue through information, questioning, discussion and understanding.

We also communicate our environmental and OHS principles appropriately to customers, suppliers and authorities outside of our locations and in this way gain additional ideas for continually improving our management system. Contractual partners working on our premises are obliged to comply with our environmental and OHS standards.

REGULATION

With the involvement of our employees and the works council, we have defined processes that serve to create and comply with our Environmental & OHS policy and our Environmental & OHS targets as well as their constant monitoring and improvement.

CLIMATE PROTECTION AND SUSTAINABILITY

We are attempting to reduce our greenhouse gas emissions - especially CO₂ emissions - and to become CO₂-neutral as a company in the medium term and to supply our customers with CO₂-neutral products.

Neckartenzlingen, 1 December 2023

Dr. Dirk Wendt, General Manager
